Quick Facts

AlphaVet Science is a premier line of natural health products exclusive for veterinarian clinics and their clients.

Products

Adapt-VM™ – used to support adrenal gland function and promotes normal hormone production. This helps to support the body from negative effects of chronic stress and helps to maintain physical and mental well-being.

Antitis-VM™ – helps ease aches and discomfort associated with daily activity and joint pain associated with arthritis while providing antioxidant support to maintain health.

Anzio-VM™ – acts as a mild sedative to support the central nervous system in dogs and cats to support a balanced behavior, promote relaxation and maintain calmness.

Articulaire-VM™ – maintains structural integrity of joints and connective tissues, thus improving joint mobility and flexibility.
